Project Manager - PRINCE, SSADM, RAD, J2EE, .NET

Duties:

- serve a contract assignment under InfoTech's headcount, full-time seconded to the client in Kowloon;
- supervise project teams to design and manage enterprise wide electronic health records projects, for example, drug database & inventory system with interfacing to the territory-wide electronic health records system. The candidate will lead the team to study on existing systems, consolidate requirements from both internal and external users, identify the optimum technical solution, prepare the tender specifications, as well as manage and oversee the system development to be conducted by contractors. He or she will work in many different business areas of public sector in collaboration with users coming from clinical and public health services. Systems should be developed under PRINCE methodology and will include system interface with external systems.
- perform project management, tender specifications preparation, SA&D, implementation and support work of IT projects.

Requirements:

- Degree holder or above in Computer Science or equivalent;
- at least 8 years' post-qualification experience of which at least 2 years' experience in similar post and in comparable capacity as a Project Manager for Bachelor's degree or Higher Diploma holders in Computer Science/IT; or at least 12 years' experience for Higher Diploma/Diploma holders in non-Computer Science/IT subjects;
- at least 6 years' mandatory experience in PRINCE and SSADM;
- at least 3 years' mandatory experience in Rapid Application Development methodology;
- at least 2 years' mandatory experience in J2EE, .NET development and OOAD;
- at least 2 years' mandatory experience in work experience in the public sector, intensive experience in managing public sector projects;
- familiar with Java Struts framework, EJB, HTML, XML, Crystal Reports, document flow/workflow management system, data warehouse, Internet/Intranet, IT planning, Reporting (Crystal Report, iReport), Windows Server 2003, Windows XP/2000, clinical related information system and public health Informatics;

- consolidated experience in design, development and management of enterprise scale systems built on J2EE or .NET platform;
- should possess sound know-how in Service Oriented Architecture (SOA) and Electronic Data Interchange (EDI);
- prior experience in clinical management system or public health system preferred;
- should have at least 5 years' experience in managing projects by using PRINCE, SSADM or RAD methodologies and be familiar with public sector IT standards and regulations.
