Presenter: Mr. Michael Gazeley
Managing Director
Network Box Corporation Limited

Abstract

When your company is plugged into the world, it's easy to forget the world is also plugged into your company. Protecting your assets and those of your clients from a growing range of security threats is a challenging responsibility. Most people ignore the seriousness of hackers, malware, undesirable content, spammers and data leaks, until it's too late. Even one successful cyber attack can devastate an organization.

In this seminar, Michael will share with you examples of successful attacks, which have been seen in both Hong Kong and elsewhere; as well as how the latest in-the-cloud anti-malware technology can help organizations solve attacks from zero day viruses. Which types of real world attacks is your company or organization likely to face today? What should you do when you are attacked? How can different solutions protect your network? Michael will clarify all of your questions by using real world examples.

Biography

Michael Gazeley is the Managing Director and Co-founder of Network Box Corporation.

Network Box was founded more than a decade ago, and is one of the world's leading Managed Security Service Providers. The company has won more than 50 national and international awards for its security technology across the globe, and has been listed in the MIS Asia | Strategic 100 for a fourth time this year.

The company protects many of the world's best known companies and organizations, including BMW, Tradelink, Toyota, Midland Properties, BUPA, Hong Kong Applied Science and Technology Research Institute, Fairwood Holdings, Chow Tai Fook Jewellery, K-Line Logistics, UA Finance, Nintendo, ISS Facility Services, Samsung, government departments and financial institutions. Network Box protects more than 150 banks and credit unions in the USA alone, including the US Air Force Credit Union.

With more than 23 years experience in the field of information technology, Michael was recognised by the world-renowned ISC² (International Information Systems Security Certification Consortium), which honoured him with its first Asia-Pacific Information Security Leadership Achievement Award in 2007.
