Analyst Programmer - JAVA, HTML5, Web Programming

Duties:

- Serve a contract assignment under InfoTech's headcount, full-time seconded to serve a client with the public sector;
- A newly formed delegated IT team to support Corporate Intelligence (CO-i 企業智慧) development which aims at enhancing the operational efficiency of the department. The core of the proposed CO-i development is a big data bank with linkage to various application systems to facilitate the Architectural Intelligence including integrated project management platform, advanced asset information system integrated with BIM (Building Information Modelling 建築信息模擬技術), mobile platform for construction site supervision and work flow digitalization, etc.
- The core big data bank will provide efficient and reliable source of information to facilitate data analysis to continue improve work process. On the other hand, the proposed CO-i development will also provide an integrated platform to interface with other external systems to support the smart city initiatives together with the existing IT team to provide software development and maintenance services to users;
- Responsible for implementing activities in developing or delivering CO-i system and services, providing technical support for IT promotional and advisory activities.

Requirements:

- At least 1 year's experience and essential technical skills in web programming and HTML5; experience in web design, maintenance and hosting is an advantage;
- At least 1 year's experience and essential technical skills in JAVA; experience in SQL is an advantage;
- Experience in implementation, maintenance and support for the following application systems is preferred: -
    - o   Native APPs under iOS and Android platforms;
    - o   Chatbot;
    - o   PRINCE methodology;
- Bachelor's degree/Higher Diploma/Diploma in Computer Science/IT or equivalent;
- At least 3 years' post-qualification experience in which at least 1 year's relevant experience.

Monthly Salary Range: $ 32000 - $37000
