

Consultant (Data & AI) - Next Team

Key Role Responsibilities:

- Drive Data & AI offerings in the market, effectively positioning those offerings with sales teams and target clients.
- Establish relationships with Solution Architects in other parts of NCS and our Data & AI partners to design the latest Data & AI offerings.
- Leverage technical acumen, and build knowledge of business to understand the trend of AI use cases across many verticals
- Participate in working sessions to discover and understand business strategy and objectives, Data & AI landscape, challenges, and prioritize & refine use cases
- As Project Manager to deliver Modern Data Platform and Advanced Analytics solutions for clients

Skill & Capability Requirements:

- Passionate about the development and delivery of Data & AI solutions
- Ability to develop capabilities and to continue to support client deliveries
- Communication and presentation skills
- Participate in the pursuit of engagements, maintaining the relationship through the delivery phase resulting in repeat client business
- Knowledge in one or more Data & AI tools available in Market
- Bachelor's degree in Statistics, Data Science, Computer Science, Business or another relevant field, or an equivalent combination of education and relevant experience
- Consulting experience would be an advantage but not essential

Competitive salary and learning opportunities will be offered to the suitable candidate. Interested candidates please send in the application letter and detailed CV with the date of availability, current and expected salary to the HR Department, hk_hrd@hk.ncs-i.com

We regret that only shortlisted candidates will be notified. Data collected will be used for recruitment purpose only.
