Position: Technical Lead (Platform Ops)

Location: New Territories

Ref. no : 20007823

The Department

Our IT Operations, Systems Assurance and Shenzhen Technology Centre drives and leverages technology refreshment and best practice service management principles, to provide cost-effective and efficient infrastructure and technical environment, system/test assurance, data centre management and valued end-user services.

The Job

- Support software engineering teams in the design, build, testing, maintenance and support of customer-facing products and services.

- Work with your cross-functional development team in HK and SZ in designing and implementing new services and applications involving real-time wagering products.

- Actively lead by example through hands-on code contributions, pair programming and providing constructive code reviews.

- Follow best practices and agreed coding standards.

- Collaborate with other delivery teams to deliver a high performance, low latency and mission critical digital platform with common services.

- Seek opportunities to constantly improve work practices and team achievements

About You

- A degree in computer science / engineering or relevant discipline

- At least 2 years hand-on experience in adopting Kubernetes (prefer Certified Kubernetes Developers/Administrator) and its ecosystem in mission-critical services with best practices

- At least 1 year hand-on experience in engineering and optimizing the performance & scalability of Cloud Native Software like Istio, RabbitMQ, Kafka, Fluentd/FluentBit, Prometheus & Grafana, and Thanos

- Hand-on experience on adoption and provision of AWS EKS or Azure AKS

- Good analytical and communication skills, able to discuss with internal users and Developers on their requirements

- Ability to work independently

- Good knowledge on implementing Helm Chart and operator pattern

- Good knowledge on Jenkins and Cloud Native Deployment tools

- Good communication and problem-solving skills

- English proficiency (written and spoken) is mandatory, able to communicate in Cantonese and Putonghua is an advantage.
