## PRESIDENT'S MESSAGE

The year 2020 has proven to be an eventful start of a new decade. We have experienced a year that was full of challenges, which also happens to be the year of our 50th anniversary celebration.

In light of the current COVID-19 pandemic in every corner of the world, Hong Kong has experienced an economic downturn and has yet to see the light at the end of the tunnel. In this midst of this difficult time, Hong Kong Computer Society (HKCS) encourages Hong Kong businesses and people to fully utilise ICT to their advantage. We also urge our members to take good care of themselves, stay healthy and strive for continuous self-improvement in the face of adversity. This also marks the perfect time for ICT diffusion into different kinds of workplaces.

Despite the pandemic, HKCS has continued to engage our members and the public by organising a series of online events. Professional and industry experts were invited to share their insights and knowledge with our members in a new format under the “New Normal”. I would like to share with you what we have accomplished as well as some of our ongoing work.

2020年，作為下一個十年的開始，可謂多事之年。香港電腦學會適逢誌慶成立五十周年，而度過了充滿挑戰的一年。

面對目前世界各地的新冠肺炎疫情仍未完全受控，本港經濟下滑，前景欠缺明朗，本會致力鼓勵香港企業及市民，更多應用資訊科技，也勉勵各位會員切記保重健康，繼續逆境自強，大家共同致力以科技幫助香港及市民共度時艱；而本年度亦是將資訊及通訊科技融入工作場所的理想時機。

疫情期間，本會通過推出一系列網上活動，繼續凝聚會員及社會大眾；在「新常態」下，廣邀專業人士及行業專才，與會員分享其真知灼見。以下將就本會的幾個主要工作目標，回顧去年的工作，並闡述未來的計劃。

In the last 12 months, HKCS has arranged a total of 45 online activities including webinars, forums, networking activities and so on to deliver the latest information and professional insights for our members and other target stakeholders. They were all very popular and attracted a large number of attendees.

In response to challenges arising from the “New Normal”, we organised our first-ever online Hong Kong International Computer Conference 2020 with the theme of “Digital Lifestyle in the New Decade”. The event explored new opportunities brought forth by the Digital Transformation, especially under the “New Normal”. More than 1,500 delegates have registered for the online Conference, representing a good mix of local and overseas public and private organisations.

We were also once again the Leading Organiser of the Hong Kong ICT Awards 2020 (HKICT Awards): Smart Business Award, continuing our track record in organising business-related ICT Awards for the past 20 years.

Although the Asia Pacific Information and Communication Technology Alliance Awards (APICTA) as well as the “Youth IT Exchange Tour 2020” were postponed due to the pandemic, HKCS has launched the Pandemic Innovative Digital Solution Awards 2020 (PIDSA 2020) this year. An online awards presentation ceremony was successfully held last December. During the event, 13 winners, including 9 from local corporates and institutions, 3 from local secondary schools and 1 from a vocational training institute, were recognised for their outstanding information technology innovations, solutions, products and applications that help the community prevent, fight and overcome the Covid-19 outbreak in Hong Kong.

本年度，本會共安排了合共 45 個網上活動，包括研討會、論壇、聯誼活動等，為會員提供最新的資訊與專業視野。各項活動都深受會員歡迎，在線出席者眾。

為回應「新常態」的發展，本會舉辦的年度旗艦活動「香港國際電腦會議2020」(Hong Kong International Computer Conference 2020)，首度轉為以網上形式舉行，會議主題為「新世代數碼生活」(Digital Lifestyle in the New Decade)，重點在探討數碼轉型，尤其在「新常態」下，為香港資訊科技業界帶來的機遇。該活動共吸引了超過1,500位來自本地及海外的公私營機構代表報名在網上出席。

在過往二十年來，本會一直主辦與商業應用有關的資訊及通訊科技獎項，成績斐然。年內，本會繼續主辦「2020 香港資訊及通訊科技獎：商業方案獎」(HKICTA2020: Smart Business Award)，為促進本地科技的商業應用作出貢獻。

儘管本年度之「亞太資訊及通訊科技大獎」(APICTA) 及「青少年資訊科技交流團」，均受疫情影響，未能如期舉辦；年內本會特別主辦「抗疫創新數碼方案獎2020」(Pandemic Innovative Digital Solution Awards 2020，簡稱 PIDSA 2020)。頒獎典禮於 12 月成功在線上舉行，共有九家本地創科企業及四家本地學校的發明獲獎，以表揚及獎勵他們有助社群預防、對抗或克勝在香港爆發的新冠肺炎疫情的傑出資訊科技創新作品、方案、產品及應用程式。

Founded in 1970, HKCS is the first non-profit professional ICT organisation established in Hong Kong. For 50 years, we have been devoted to the development of the Hong Kong ICT industry, facilitating the growth of IT professionals across industries while working to enhance their professional image and standards. As a well-respected and leading ICT organisation, HKCS is also committed to community services and ensuring that IT plays a vital role in social development while exerting a positive impact on the lives of the public.

HKCS has organised a series of events this year to celebrate our 50th anniversary. “The Outstanding ICT Women Awards 2020” (OICTWA 2020) was held again after it was first launched in 2015. An Awards Presentation Ceremony was held online in August. It was an initiative by FACE Club to honour female practitioners in the ICT sector who have made significant achievements and contributed to the industry in Hong Kong and the community at large. The awards consist of three categories. The “Outstanding ICT Women Professional Award” recognised female ICT professionals working in Hong Kong aged over 25, who were assessed based on their past ICT achievements, professional contributions to the ICT industry, leadership and community contributions. For young female ICT practitioners aged 25 and below, the “Outstanding ICT Rising Star Award” acknowledged their ICT-related achievements and innovative use of ICT, active participation in industry activities, personal aspirations and community contributions. Winners of the “Outstanding ICT Women Entrepreneur Award” were judged by their past ICT achievements, personal contributions to the ICT Industry, leadership and impacts on community betterment – not just by their ability to run a successful ICT business in Hong Kong.

香港電腦學會成立於1970年，是香港首個非營利資訊科技專業機構。50年來，我們一直秉承致力發展香港資訊科技行業和工業、凝聚企業資訊科技人員及專才的力量，群策群力，共同提升業界形像及專業水平的宗旨；而作為一個備受尊敬的專業機構，香港電腦學會亦致力於專業和行業的發展、社區服務，以及確保資訊科技繼續推動社會發展，能對大眾的生活產生積極影響。為慶祝成立 50 周年，年內本會舉辦了多項活動，以誌其盛。

繼 2015 年首屆頒發後，本會在 2020 年再度主辦「資訊及通訊科技傑出女士獎 2020」(OICTWA 2020)，網上頒獎典禮於 8 月舉行。OICTWA 由香港電腦學會的女性組織 FACE Club 主辦，旨在表揚和獎勵香港女性，對資訊及通訊科技行業發展的貢獻上，發揮至為重要的作用。該獎項分為三大類別。其中，「資訊及通訊科技傑出專業女士獎」的參加者，必須為年滿25歲的香港女性居民，評審會著眼於其過往在資訊及通訊科技方面取得之成就、對行業之專業貢獻、領導才能，以及服務社會方面之貢獻。而只准年齡未滿 25 歲之香港女性居民參加的「資訊及通訊科技傑出女明日之星獎」，則會衡量參加者於資訊及通訊科技方面取得之成就，表揚在學術以及科研有傑出成績及具創意地應用資訊及通訊科技、積極參與行業活動、個人抱負，以及服務社會方面之貢獻。而「資訊及通訊科技傑出女企業家獎」則會審視其過往於資訊及通訊科技方面取得之成就、對行業之專業貢獻、領導才能，以及對改善社群方面之影響，而非僅視乎其商業成就。

## HONG KONG COMPUTER SOCIETY 香港電腦學會

Furthermore, we developed and launched a new corporate identity in early September of last year. The colours of the new logo are Blue and Green, similar to the colours of our past logo to sustain recognition. Blue represents modern technology and a deep understanding of technology, while Green represents endurance and vigour. The two colours represent HKCS' long history and devotion to staying on top of the industry through development and innovation. The straight line symbolises the inheritance of the past and the creation of the future.

In addition, the four-letters 'HKCS' are perfectly combined into one graphic to attract attention and express our dedication to keep the unity of society, recognition and respect. Its square shape also shows the professionalism, structure, solidity and stability of the industry in serving society. The new logo highlights our determination to stay at the forefront of technology and society, and continuous strive for the betterment of lives and society through ICT.

Besides, a "Hong Kong Computer Society 50th Anniversary Commemorative Publication" has been published in the first quarter of 2021 as one of the major initiatives of our semi-centennial celebration.

本會於 2020 年 9 月初推出全新會徽作為品牌標誌。新會徽採用藍色及綠色作為主色調，乃源於現有會徽的同一色系，有助連繫新舊形象。藍色代表現代科技和深遠浩瀚，綠色代表四季蔥翠和春意盎然，比喻學會歷久彌新，為業界不斷創新的象徵。會徽中的直線，則代表承先啟後，承傳過去，開創未來。

而會徽中的學會英文簡稱 HKCS，單看已知其代表組織。四個字母充滿視覺衝擊的完美組合，連結暢順，象徵學會成員的團結，為專業爭取認同與尊重。此外，方正的外型，有學術和專業感，穩重有重量感，象徵學會在業界的地位。

本會於 2021 年第一季，出版了《香港電腦學會五十週年紀念特刊》，作為其中一項誌慶項目。

Although some celebration events including the HKCS 50th Anniversary Annual Dinner were postponed due to COVID-19, we are confident that these events will soon be resumed when we have more control of the pandemic in the near future.

For the past five decades, HKCS has been fortunate to have many opportunities for growth and development by overcoming numerous overwhelming challenges. Even to the present day, HKCS is still full of vitality and potential. This indeed is nothing short of a miracle!

I would like to take this opportunity to thank all the members, Council members, members of HKCS various committees and secretariat for your outstanding performance and contributions. Thanks to your steadfast support, HKCS was able to maintain its leading position in the industry for the past 50 years, even during these difficult times of the pandemic. Your selfless efforts, hard work and remarkable contributions have helped HKCS operate as a viable whole and achieve outstanding results. I am honoured to work alongside you and enjoy the fruits of our collaborative success. With your devotion and support, I believe HKCS will continue to be the largest ICT professional body in Hong Kong.

雖然部份慶祝活動，包括香港電腦學會金禧週年晚宴，均受疫情影響而延期舉行。相信在未來疫情受控後，本會將恢復舉辦。

在過往五十年中，充滿發展的機會，也充滿了挑戰，香港電腦學會能夠發展至今時今日，仍然充滿生命力和潛能，實在非常難得。本人希望藉此機會，再次向全體會員、理事會成員、本會各委員會的委員，以及秘書處的卓越表現，致以衷心的謝意。感謝大家一直不懈支持香港電腦學會，令本會得以在五十年來，就算在疫情期間，仍能繼續維持在業界的領導地位。各位的無私努力，勤奮工作及卓越貢獻，令香港電腦學會能群策群力，精誠團結，達致美滿的佳績。本人能與各位共事，共創成果，感到非常榮幸。繼往開來，相信在各位的助力下，預期本會作為全港最具規模的資訊科技專業學會，來年亦必繼續茁壯。

## Hong Kong Computer Society's Response to Chief Executive's 2020 Policy Address

### 香港電腦學會對行政長官施政報告 2020 的回應

2020/11/25

The Hong Kong Computer Society (HKCS), as the well-established and the largest ICT professional association in Hong Kong, expressed its support and welcomed the continued investment in the development of innovative technology and smart cities to enhance Hong Kong's competitiveness in the long run, as well as the announcement of a number of innovative technology policies, in this year's Chief Executive's Policy Address. Under the Policy Address announced today, HKCS is pleased to see that there will be closer innovation and technology cooperation with Shenzhen and the Greater Bay Area, further promotion of smart city by the government, the plans of digitalisation for a number of government services, the launch of Smart Mobility to improve Hong Kong's transportation planning, the support to the popularisation of 5G technology, and the promotion of the learning and exchanges among ICT talents between Greater Bay Area and Hong Kong, as well as the initiatives to attract more foreign STEM talents, and strengthening support for the e-learning needs of disadvantaged students. Under the "new normal" affected by the epidemic, HKCS welcomes to see the government's initiatives to encourage continued digital transformation among all walks of life, and at the same time actively promote the digitalisation of the construction industry and the cloudification of legal services. It also strives to promote the development of Art Tech, with the lead by the Secretary of Home Affairs jointly cooperated across Innovation and Technology Bureau, the Commerce and Economic Development Bureau as well as the Education Bureau.

作為本港歷史最悠久，最具代表性的資訊科技專業機構，香港電腦學會對本年度行政長官施政報告表示積極支持，尤其施政報告提及政府將繼續投資發展創新科技及智慧城市，長遠提升香港的競爭力，並宣布多項創新科技，包括與深圳以至大灣區創科合作，政府將進一步推動智慧城市發展，準備推出多項政府服務的電子化，以智慧出行改善香港交通規劃，支援 5G 建設普及化，促進大灣區與香港科技人才學習交流，吸引更多外來科技人材，加強資助弱勢社群學生的電子學習需要；並特別在受疫情影響的『新常態』下，鼓勵各行各業繼續進行數碼轉型，並積極推動建造業科技化及法律服務雲端化，更將以民政事務局牽頭，與創科、商務及教育等政策局進行跨界別合作形式，推動發展藝術科技等。

Dr. Ted Suen, MH, President of the Hong Kong Computer Society, said: "We are glad to see that the government has taken innovative technology as the driver for economic development, government services improvement and career future for youngsters of Hong Kong upon whom it has been focusing on investing in innovative technology for the past few years. Policies and related work are already underway and some results have been achieved. The Hong Kong Computer Society has always seen the importance to the cultivation of scientific and technological talents. We strongly support the plans under the Policy Address to attract more overseas STEM talents into Hong Kong, and the arrangement of local young people to work in scientific and technological areas in the Greater Bay Area. This move can broaden the horizons of the local talents, and especially for the youth employment and entrepreneurship programs in the Greater Bay Area, they can help local young talents crafting a better understanding of the development potential of the Greater Bay Area, as well as the operation, management and career opportunities of the ICT industry, which will be very useful for enriching the talent pool for local technological development in the future. In addition, in the policy address, the Chief Executive especially expressed her gratitude to the Hong Kong technology industry for its contribution in the fight against and prevention of the epidemic. It clearly demonstrates that technology has become an important pillar for improving our society and people's livelihood, and the development of the innovation and technology industry has become one of the government's main policies."

香港電腦學會會長孫耀達博士MH稱：「近年來，在施政報告中，政府已視創科和資訊及通訊科技，為本地經濟發展及智慧城市生活的推動力。我們樂見政府繼續加強投資創新科技，政策及相關工作已在進行，亦取得一定的成果。香港電腦學會一向重視科技人材培育，對於施政報告提出，吸引更多海外科技人材來港，以及安排本地年青人前往大灣區進行科技工作，我們深表支持。此舉既可以擴闊本地人材的視野，特別是大灣區的青年就業及創業計劃，可以令本地年青人材對大灣區的發展潛力，以至創科行業的運作、管理和事業機會，會有更進一步的認識，對於提升日後本地科技發展的人材儲備，非常有用。此外，行政長官在施政報告中，更特別感謝香港科技行業對社會抗疫和防疫上的貢獻，可見科技亦已成為改善社會民生的重要支柱，而發展創科行業亦已成為政府的主要政策之一。」

Dr. Ted Suen continued: “However, HKCS believes that, on the smart city development front, the government can collect broader ideas and opinions from wider scope of industries, academia and overseas experts. In addition, in the fight against and prevention of the epidemic, it can strengthen the application of local innovation and technology achievements, as well as support the disadvantaged groups to cope with the digital needs under the new normal. Meanwhile, we also urge for the attention to talent training to fill the digital gap and formulation of necessary legal provisions in accordance to the latest technological development.” Dr. Ted Suen noted that, with the essence of the “2020 Policy Address” being “Expanding Global and Greater Bay Area Opportunities. Building an International Innovation and Technology Center”, the main part of the Policy Address is short and precise, and the “Supplement” section contains policies in various areas; Among those which are related to innovation and technology, the Hong Kong Computer Society is pleased to see and welcome the government’s announcement of the following major new measures to be implemented.

孫耀達博士續稱:「然而,香港電腦學會認為政府可以就發展智慧城市上,更多元化地徵詢業界、學界及海外專家意見,以集思廣益。此外,可在抗疫防疫工作上,加強應用本地創科成果,並支援弱勢社群應對『新常態』下的數碼化需要。在人材培訓填補數碼差距,制定因科技發展需要而衍生的法律條文等,都應予以關注。」孫耀達博士指出,《2020施政報告》的精神,為「拓環球和大灣區機遇.建國際創科中心」;報告以精簡為主,而在《附篇》部份則刊載各範疇的政策,其中關於創新及科技部份,香港電腦學會欣然見到政府公布如下即將推行的主要新措施,並對此表示歡迎:

- To be more proactive in encouraging the related sectors to apply for funding under the Arts and Sport Development Fund, the Innovation and Technology Fund, the Film Development Fund and the CreateSmart Initiative to implement projects that integrate technology and arts
- A total of \$100 million is set aside under the various funds, and to provide venues and complementary facilities for experimental use

#### 6. 推動創意產業及藝術科技發展

- 向「創意智優計劃」再注資 10 億元，進一步推動香港創意產業發展，以及為業界在疫情下適應「新常態」帶來的衝擊提供支援。
- 在香港推動發展藝術科技(Art Tech)。
- 已指派民政事務局局長牽頭，成立包括創新及科技局、商經局及教育局的專責小組，並邀請相關界別代表和非政府組織，一起制訂發展及推廣藝術科技的策略和措施。
- 更積極推動有關界別向「藝術及體育發展基金」、「創新及科技基金」、「電影發展基金」和「創意智優計劃」申請撥款，進行科技與藝術互融的發展和推廣計劃。
- 已為各基金預留合共1億元，亦會提供場地和配套設施作實驗用途。

## 7. Promote digitalization in all walks of life

- Further to the establishment of the LawTech Fund and the COVID-19 Online Dispute Resolution Scheme under the second round of the AEF, the DoJ will actively explore the development of the Hong Kong Legal Cloud, a state-of-the-art online facility equipped with advanced information security technology, to provide secure, reliable and affordable data storage services for the local legal and dispute resolution sector
- The Development Bureau (DEVB) has been proactively implementing the “Construction 2.0” initiative to facilitate the “professionalisation” and “revitalisation” of the traditional construction industry with the wider adoption of I&T. The CE will chair an International Construction Leaders Summit next year to collect views from and formulate strategies with various stakeholders

### **Hong Kong Computer Society's Recommendations on the Policy Address**

Dr. Ted Suen said: “Apart from the actions stated in the Policy Address, the HKCS would urge the Government to focus strategically on the following to enhance the Policy’s holisticness.”

#### **1. Establish a Smart City Advisory Committee**

- It is recommended to widely invite participants from technology industry, academics, and foreign experts to form an advisory committee, to provide more diversified suggestions on the government’s planning of smart city development.
- Numerous local experts under the umbrella of the Hong Kong Computer Society are also happy to provide professional advice on the development of innovation and technology and smart cities for the government.

## 推動各行各業數碼轉型

- 繼在第二輪「防疫抗疫基金」下設立「法律科技基金」和「新型冠狀病毒網上爭議解決計劃」後，律政司將積極研究發展「香港法律雲端」，一個配備先進資訊保安技術的線上設施，為本地法律及爭議解決業界，提供安全穩妥及可負擔的資料儲存服務。
- 發展局積極落實「建造業2.0」，令行業變得「專業化」、「年青化」，並採用更多創新科技。在明年行政長官將主持「國際建造領導高峰會」，集思廣益，以進一步推動建造業的數碼化和革新，提升項目表現。
- 推動漁農業邁向高增值及可持續發展，在古洞南設立農業園，協助培育農業科技和農場管理現代化，並為農戶提供技術支援。農業園第一期工程即將展開，預期明年至2023年分階段完成。

### **香港電腦學會對施政報告的建議**

孫耀達博士表示，香港電腦學會對施政報告在增加其政策全面性方面，再有以下的建議，以供政府考慮：

#### **1. 成立智慧城市顧問委員會**

- 建議廣邀科技業界、學者、外地專家，組成一個顧問委員會，就政府的智慧城市發展，提供更多元化之建議。
- 香港電腦學會屬下眾多的本地專家，亦樂意為政府發展創科及智慧城市提供專業意見

## 2. Strengthen I&T application in fighting the epidemic

- The Chief Executive expressed her gratitude to the contribution of technological products in preventing and fighting the epidemic and to maintaining economic operations during the epidemic.
- The government is recommended to encourage the industry and academia to develop more relevant technologies that help prevent and fight the epidemic, and reward those who have made outstanding contributions.
- And the Government to assist the commercialisation and promotion of related products or solutions.

## 3. Strengthen the support of the digitisation for disadvantaged communities

- Under the influence of the "new normal", e-learning will largely become the "new normal" of education. Therefore, the government is recommended to support school children and low-income families to access the Internet, as well as the regularisation of subsidies for purchasing computers and communication equipment.
- The government should allocate additional resources to support non-governmental organizations and charitable service groups to carry out operations electronically. Even when the relevant personnel are working at home, the recipients can still obtain the required services online.

## 2. 加強應用科技對抗疫情

- 樂見行政長官對於疫情之下，科技產品對防疫、抗疫，以至維持經濟運作的貢獻，作出致謝。
- 建議政府鼓勵業界及學界研發更多有助防疫、抗疫的相關科技，並對有傑出貢獻者作出獎勵。
- 協助將相關產品或方案，進行商業化應用及推廣。

## 3. 加強支援弱勢社群數碼化

- 由於受「新常態」影響，相信電子學習亦很大程度上將成為教育的「新常態」，因此建議政府將支援學童及低收入家庭上網，以及購買電腦及通訊設備的資助恆常化。
- 政府應增撥資源，支援非政府組織及慈善服務團體，進行運作電子化，就算相關人員須在家工作時，受助者仍可在線上獲得所需服務。

#### 4. Filling the digital skill gap

In June last year, the Asia-Pacific Economic Cooperation (APEC) published an Asia-Pacific regional survey on the "digital skills gap." 75% of the respondents, including employers, government officials, academics, etc., all indicated that there is an obvious problem of skill mismatch. If there is no more training to upgrade digital skills, it is believed that a large number of workers will be unemployed due to automation; and skill mismatch not only harms labor, but also harms the overall economy. If there are not enough people qualified for the main positions, productivity will definitely decline.

The digital economy is developing rapidly, but the education system has not been able to catch up. At the APEC forum, which included participants from the Hong Kong University of Science and Technology, has come up with a roadmap to support and strengthen digital skills upgrading and retraining courses. The roadmap has been delivered to employers, governments and educational institutions in the Asia-Pacific region for implementation in the region.

The HKCS recommends that the Government should take the initiative to formulate policies to bridge the digital skills gap, including:

By supporting the large number of information and communication technology practitioners, to enhance their mastery of the new digital technology, and enhance the training of IT staff for the IT posts which are facing talent shortage. In addition, the HKCS has recommended that the Government should make good use of big data to collect the public views from the young generations, formulate relevant policies for the development of open data and artificial intelligence, and at the same time devote more resources into e-learning, especially for the benefits of the disadvantaged and poor families.

#### 4. 填補數碼技能差距

去年六月，亞太經濟合作組織(APEC)就「數碼技能差距」，發表了一個亞太地區性的調查。有75%的回覆者包括僱主、政府官員、學者等，均表示有明顯的技能錯配問題存在。如果再無更多提升數碼技能的培訓，相信會有為數眾多的工人因自動化而失業；而技能錯配不僅損害勞工，亦會對整體經濟造成傷害。如果能勝任主要職位者不足夠的話，生產力必定會下降。

數碼經濟的發展一日千里，而教育制度卻沒有配合追上。在APEC的論壇上，包括香港科技大學的參與者，完成了一個路線圖，旨在支援及加強數碼技能的提升及再培訓課程，並交由一眾僱主、各地政府及教育機構在亞太區內推行。

香港電腦學會建議政府應主動制訂政策，以填補數碼技能差距，包括：

政策方面，目前香港政府並未制定政策，填補數碼技能差距，例如協助資訊及通訊科技從業員，提升對嶄新數碼科技的掌握，以及增強對求才若渴的專業資訊科技職位如人工智能、數據工程師及科學家、資訊保安等的人材培訓。此外，對本地的服務供應商的升級轉型，亦應予以支援。建議政府參考APEC路線圖，作為填補數碼技能差距之模式，以及基於目前現況，推出或優化本港的相關政策，鼓勵及資助專上院校發展及更新課程，以迎合未來的數碼技能需要。

- In terms of policy, the Hong Kong Government has not yet formulated policies to fill the gap in digital skills, such as helping information and communication technology practitioners to enhance their mastery of new digital technologies, and as well enhancing the training of the high-talent-demand professional IT positions such as artificial intelligence and data engineers, and scientists, information security, etc., while providing support to local service providers on their service upgrades. It is recommended that the Government should refer to the APEC Roadmap as a model for filling the digital skills gap and to introduce or optimise Hong Kong's relevant policies based on the current situation; to encourage and subsidise tertiary institutions to develop and update the curriculum, so as to cater for future digital skills needs.
- The government should provide incentives to encourage government departments and enterprises to enhance their modern digital skills of their employees; courses should include online courses and certification, as to many of the employees, online training is more popular with greater flexibility than classes.
- The Hong Kong Computer Society strongly believed that it is very important for the Government to support the promotion of STEM education, and HKCS recommends that the education experts should continue to optimize and improve the STEM education system of our schools.
- Hong Kong has a strong asset pool of information and communication technology talents. To fill the digital skills gap and assist in the digital transformation of industries, the government should take the lead in using local technology talents, such as appointing them to join relevant government committees or working groups, and encourage public institutions such as the Monetary Authority, the Mandatory Provident Fund Management Authority, the Airport Authority, the Housing Authority, the Insurance Regulatory Authority, etc., to carry out similar appointments to maximize the use of their talents.
- 政府應提供誘因，鼓勵政府部門及企業，提升僱員的現代數碼技能；而課程應包括網上課程及認證。對於不少僱員而言，網上培訓比課堂上課更受歡迎，而且較具彈性。
- 目前香港銀行金融行業發達，對資訊科技及資訊保安的需求日殷，然而人材供應卻遠遠不足應付。為填補此個別的數碼技能差距，建議大學及職業訓練局應開辦更多資訊保安課程，並擴充學生人數。課程內容必須能配合目前不斷變化的保安威脅及相關防禦技術的發展。
- 政府對 STEM 教育的推動非常重要，香港電腦學會深表支持，並建議教育專材應繼續優化及完善本港學校的 STEM 教育系統。
- 本港擁有一些不少資訊及通訊科技的人材資產，在填補數碼技能差距上及協助工業數碼轉型上，政府應帶頭重用本地科技人材，例如委任更多人材加入相關的政府委員會或工作小組，並鼓勵公營機構例如金融管理局、強積金管理局、機場管理局、房屋委員會、保險業監管局等，進行類似的委任工作，以達致人盡其才。

## 5. Analyzing social sentiment with big data

At present, many young generations in the society have different opinions and voices on government administration. It is necessary for the government to strengthen the reach-out to the public opinions. It is recommended to use big data and artificial intelligence technology to analyze the data of young generations, that are collected through outreach and liaison activities. Through analysis, to understand and predict changes in social sentiment, so that the Government would be able to more accurately get hold of the public opinions as reference for formulating policies.

## 6. Open Data Policy

The government's Policy Address for the past two years has mentioned the policy goal of open data. However, in the past two years, progress has been slow. The Hong Kong Computer Society recommends that the Policy Address can include proposals of more effective and clear implementation methods to achieve the goal; and set up an open priority, based on the value of the data to the business community and the public. It is recommended that the government should conduct adequate consultation with all major stakeholders, including government departments, public and private organizations, security and privacy professionals, and open service providers, to develop an open data framework. It is particularly important to establish clear guidelines on risks and benefits of data privacy, as well as the awareness and participation of the community and stakeholders in the open data policy, during the different stages of the adoption. And it is essential to use various technical and administrative measures to reduce the risk of personal data privacy intrusion.

## 5. 以大數據分析社會情緒

目前社會上不少年輕人對政府施政有不同意見及聲音，政府有必要加強對民意之掌握。建議採用大數據及人工智能科技，分析經由外展及聯繫活動收集的年輕人意見數據，進行分析、了解及預測社會情緒的變化，更準確地了解民意，以作為施政時的參考。

## 6. 開放數據政策

政府在過去兩年的施政報告，都有提及開放數據的政策目標，然而兩年以來，進度仍覺緩慢。香港電腦學會建議施政報告提出更有效及清晰的實施方法，以達致目標；並根據數據對商界及公眾的價值，訂出開放的優先次序。建議政府應對各主要的持份者，包括政府部門、公營及私營機構、保安與私隱專才，以及開放服務提供者等，進行充份諮詢，以發展開放數據的框架，特別是在開放數據的不同階段，制定數據私隱風險及益處分析的指引，以及社群與持份者對開放數據政策的意識及參與，並盡量運用各種技術及行政措施，以減低個人數據私隱遭入侵之風險。

## 7. Artificial Intelligence Policy

In the digital age, it is inevitable that artificial intelligence and machine learning will affect Hong Kong's economic and social development. The government should develop artificial intelligence policies to support the application of related technologies and supervise their applications and formation in various important services. Policies should include ethical requirements for the application of artificial intelligence, technological development, compliance with individual industry legal requirements, data sharing policies, privacy and compliance, etc. It is recommended to establish a high-level advisory committee to supervise its development. The committee must analyze and deal with the many traditional types of jobs that are likely to be eliminated due to the emergence of artificial intelligence, including the impact on the labor market, ways to assist in labor transformation, social expectation management for labor market changes, retraining and skill upgrading of labor, etc. All the above factors require strategic cooperation from the government to prepare the next generation for the digital transformation society to ensure the stability and prosperity of Hong Kong.

## 7. 人工智能政策

身處數碼年代，人工智能及機器學習影響香港的經濟及社會發展，已是無可避免。政府應發展人工智能政策，以支援相關技術的應用，並監管其在各項重要服務中的應用與形式。政策應包括應用人工智能的倫理要求、技術發展、符合個別行業法例要求、數據分享政策、私隱及合規等。建議設立一個高層次的顧問委員會，以督導其發展。委員會須分析及處理由於人工智能的出現而面臨淘汰的眾多傳統工種，包括對勞工市場的衝擊、如何協助勞工轉型、對勞動力市場變化進行社會期望管理、對勞動力的再培訓及技能提升等。以上各項因素均需政府進行策略性配合，為下一代的數碼轉型社會早作準備，以確保香港的安定繁榮。

## Response to Government 2021 Budget 香港電腦學會回應財政預算案2021

2021/02/24

The Hong Kong Computer Society (HKCS) expresses support to the 2021 Budget delivered by Mr. Paul Chan GBS MH JP, the Financial Secretary today. The Budget clearly indicates its focus on the science and technology development in Hong Kong, for driving economic growth through innovation and technology (I&T), promoting and funding the development of local scientific research and I&T industries, and its emphasis in the use of technology to fight epidemics and prevent epidemics, re-industrialization, development of innovation and technology infrastructure, assistance to the youth I&T start-ups, further development of e-government services, the establishment of Hong Kong as an innovation and technology center in the Greater Bay Area in accordance with national policies, and funding the Hong Kong Trade Development Council to establish a virtual platform, etc. HKCS welcomes Financial Secretary's efforts in strengthening the nurturing of I&T talents starting from primary schools, regularizing the subsidies to short-term internships for I&T industry, creating a good investment environment in innovation and technology, attracting more innovation and technology talents to Hong Kong, and increasing funding to encourage the use of I&T in broader industries and enterprises, etc., and introducing related preferential policies and injecting funding, which are appreciated by HKCS.

香港電腦學會對財政司司長陳茂波今日發表財政預算案 2021，表明繼續注重香港科技發展，以創科推進經濟增長，並推動及資助本地科研及創科行業發展、利用科技抗疫防疫、再工業化、發展創科基建、協助青年創科創業、進一步發展政府電子服務、配合國家政策將香港建立為大灣區創科中心，以及資助貿易發展局建立虛擬平台等，表示支持；並歡迎財政司司長在由小學開始加強創科人才培育、將資助創科行業短期實習恆常化、營造良好創科投資環境、吸引更多創科人才來港，增加資助鼓勵多個行業及企業引進創新科技等方面，推出相關的優惠政策及注入資金上，表示欣賞。

Dr Ted Suen MH, President of the Hong Kong Computer Society, said: "As the most well established and the largest ICT professional association in Hong Kong, the Hong Kong Computer Society fully agrees and supports the Government's emphasis in enhancing Hong Kong's competitiveness through innovation and technology. The Budget does not only demonstrate that the government will continue to invest in the development of innovative technology and related infrastructure, promote scientific research, nurture talents, encourage companies to make good use of technology, continue to develop e government services, position Hong Kong as an innovation and technology center in the Greater Bay Area, to enhance Hong Kong's competitiveness in the long run, it also announces a number of innovative technology policies, which we support and welcome."

#### **Hong Kong Computer Society's Response to the Budget**

Dr Suen pointed out that, in the past two years, HKCS had recommended that the government should try to fill the "digital skills gap" to support the large number of information and communication technology practitioners, to enhance their mastery of the new digital technology, and enhance the training of IT staff for the IT posts which are facing talent shortage. Some of the related remedial measures have been reflected in this year's Budget. Among them, the "Re-industrialization and Technology Training Program" has provided on the job training for over 3,500 employees of some 1,800 enterprises to enable them to better grasp the development of the new economy and I&T.

香港電腦學會會長孫耀達博士MH稱：「作為本港歷史最悠久，最具代表性的資訊科技專業機構，香港電腦學會完全同意及支持政府透過創科提升香港的競爭力，亦對財政預算案中，提及政府將繼續投資發展創新科技及相關基建、鼓勵科研、吸引投資、培育人才、鼓勵企業善用科技，繼續發展電子化政府服務，配合將香港發展為大灣區創科中心的定位，長遠提升香港的競爭力，並宣布多項創新科技的政策，表示支持及歡迎。」

#### **香港電腦學會對財政預算案的回應**

孫耀達指出，香港電腦學會近兩年均曾建議政府應設法填補「數碼技能差距」，以支援為數眾多的資訊及通訊科技從業員，提升對嶄新數碼科技的掌握，以及增強對青黃不接的資訊科技職位的人材培訓，部份已在財政預算中反映。其中，「再工業化及科技培訓計劃」已為一千八百多家企業的逾三千五百個僱員提供在職培訓，使他們更掌握新經濟及創新科技的發展。

### Nurturing IT Talent Starting from Childhood

Dr Suen said: "We are pleased to see that the government has responded positively to our demand for the nurturing of IT talents, such as strengthening STEM education in primary and secondary schools; extending the IT Innovation Lab in Secondary Schools Programme to primary schools, rolling out a "Knowing More About IT" Programme to enhance students' interests and knowledge in information technology and their applications through extra curricular activities. HKCS is also willing to provide support to the IT talent training programmes of primary and secondary schools through its member network. We also strongly support the regularisation of government subsidies for students who study science and technology in local universities to enroll in short term I&T related internships. The programme was launched last year as a pilot scheme, with overwhelming responses, and with eighty per cent of the interns indicating they would consider pursuing a career in I&T after graduation. This pivoted a very positive significance in local technological talent cultivation.

It is worth noting that, in support of professional talent development, HKCS has also been contributing to nurturing the next generation of IT talents through programs like iLEAP, which provides a forum, with mentorship and training, for senior IT practitioners to exchange knowledge, views, insights and professional/managerial experiences related to Information Management, Information Systems and Information Technology; We have also been supporting gender diversity through HKCS FACE Club and nurturing future women leaders."

### Launching the First Award to Recognise Pandemic I&T Solutions

With the epidemic, all walks of life are accelerating digital transformation, and information technology has also made a lot of contributions in the prevention and combat against the epidemic. Similar to many organisations and with more intensity, HKCS has been holding a large number of virtual webinars to support HK's IT community growth despite the pandemic.

### 支持政府從小培育本地創科人才

孫耀達稱：「我們樂見政府正面回應了香港電腦學會對資訊科技人才培育的訴求，例如加強中小學的 STEM 教育；將『中學 IT 創新實驗室』推展至小學，推動『奇趣 IT 識多啲』計劃，通過課外活動加強小學生對資訊科技的興趣、認識及應用。香港電腦學會亦樂意透過會員的網絡，對中小學的資訊科技人才培育計劃提供支援。我們亦非常支持政府對本地大學理工科學生，參與創科行業短期實習的資助恆常化；該計畫去年以先導形式推出，取得滿意成績，有八成實習生表示畢業後會考慮投身創科工作，對本地的科技人才培育，有非常積極的意義。」

### 率先以獎項表揚抗疫有功的 IT 方案

在疫情下，各行各業都加速數碼轉型，而資訊科技在抗疫防疫中，亦作出了不少貢獻。

Dr Suen pointed out that the "Pandemic Innovative Digital Solution Awards 2020" (PIDSA 2020) hosted by HKCS in the fourth quarter of last year is the first award in Hong Kong, that specifically recognise and award those outstanding IT innovation projects, solutions, products and applications that help the community prevent, combat or overcome the COVID-19 pandemic. The innovations by a total of nine local I&T enterprises and four local schools have won awards, including the electronic wristbands used for home confinement and the touchless lift button system praised by the Financial Secretary today. HKCS believes that information technology will make greater contributions to helping the society fight the epidemic and restore the operation of enterprises and education; and the recognition of awards will encourage more technology companies to participate in the development of anti-epidemic products and solutions, which will better benefit the society of Hong Kong.

#### **Joining Force with Invest Hong Kong to Attract More Overseas Investment from I&T Enterprises**

Dr Suen expressed deep support for the government's preparations to promote Hong Kong after the epidemic, including promoting Hong Kong's position as an innovation and technology center. Dr Suen pointed out that HKCS, as a member of the Executive Committee of the Asia Pacific Information and Communications Technology Alliance Awards (APICTA), which is broadly recognised as the "Oscar Awards" of ICT Industry, is responsible for the selection and nomination of outstanding entries that have won awards in the local information and communication technology industry to participate in the competition to promote Hong Kong's technology overseas, with outstanding results. HKCS is very pleased to cooperate with Invest Hong Kong, and work together to attract more overseas I&T enterprises to invest in Hong Kong.

孫耀達指出，香港電腦學會去年第四季主辦「抗疫創新數碼方案獎 2020」(Pandemic Innovative Digital Solution Awards 2020, 簡稱 PIDSA 2020)，是全港首個專門表揚及獎勵有助社群預防、對抗或克勝新冠肺炎疫情的傑出 IT 創新作品、方案、產品及應用程式的獎項，共有九家本地創科企業及四家本地學校的發明獲獎，其中包括今日財政司司長點名讚揚，應用於家居隔離的電子手環及電梯的「無觸式」按鈕面板。

香港電腦學會相信，資訊科技在協助社會對抗疫情，恢復企業及教育的運作上，將可作出更大的貢獻；而獎項的表揚將可鼓勵更多科技企業，參與開發抗疫產品及方案，令香港社會獲益更多。

#### **願與政府攜手藉創科優勢吸引外來投資**

香港電腦學會對於政府在疫後準備推廣香港，包括宣傳香港的創科中心定位，深表支持。孫耀達指出，香港電腦學會作為被譽為「ICT 業界奧斯卡」的「亞太資訊及通訊科技大獎」(Asia Pacific Information and Communications Technology Alliance Awards, 簡稱 APICTA) 香港區執行委員會委員，由 2001 年起負責甄選並提名曾獲得本地資訊及通訊科技業內獎項的優秀作品參賽，將香港科技向海外推廣，成績斐然。香港電腦學會非常樂於與投資推廣署配合，共同為吸引更多海外創科企業到港投資出一分力。

### Urging the Launch of Research Programme for "Congestion Charging" and Electronic Road Pricing Pilot Scheme

Dr Suen added, the government has been promoting the development of smart cities. However, most of the measures introduced in the past have focused on the overall policy level. This Budget states that the government will implement a series of urgently needed tasks, such as e-government services, the "iAM Smart", digital authentication platform for corporate entities etc., are all encouraging.

Dr. Suen said, "Personal data protection has been used as the scapegoat for the silo effects that we have seen in most of our public information systems. This has hindered the proper information exchanges among government agencies which are needed for effective governance and administration of public services. The iAM Smart services can be the catalysis of an important change that will allow citizens to opt-in and control the sharing of their personal data among government agencies."

HKCS also has high expectations for the "Congestion Charging" and the Electronic Road Pricing Pilot Scheme in Central by the Transport Department; It has been about thirty years since the project was proposed, and it is hoped that the research can be completed as soon as possible for its implementation.

### Keeping Informed of the Status of Digital Tax Policy

The Organisation for Economic Co-operation and Development (OECD) is drawing up new proposals to address base erosion and profit shifting (BEPS 2.0), which include the introduction of a global minimum tax rate and a digital tax. The Financial Secretary stated that, as an international financial and business centre, Hong Kong will actively implement the BEPS 2.0 proposals according to international consensus.

### 促儘快落實擠塞徵費研究

孫耀達表示，政府一直在推動智慧城市發展，然而，以往推出的措施，大部份都著眼於整體政策層面，今次財政預算案提及政府將推行一連串急切需要推行的工作，例如政府服務電子化、更普及應用「智方便」、推出企業版的「智方便」數碼身分認證平台等，都令人鼓舞。

孫耀達稱：「在大多數公共訊息系統中，往往以保護個人數據，作為各自為政的藉口。此舉阻礙了政府機構間正確的訊息交換，但卻正是有效管治和管理公共服務所必需的。政府普及推行的『智方便』服務，可有助市民選擇是否容許政府部門之間共享其個人數據，在政府服務而言，可說是一個重要的變革，本會樂見其成。」

孫耀達補充，香港電腦學會對運輸署正進行研究的「擠塞徵費」及中環電子道路收費先導計劃，亦深具期望。該項目由提出至今，已經約三十年，希望能儘快完成研究，並予以落實推行。

### 關心香港數碼稅政策

關於經濟合作與發展組織正為應對侵蝕稅基及轉移利潤而制訂新方案(Base Erosion and Profit Shifting 2.0, 英文簡稱「BEPS2.0」)，包括引入全球最低稅率及數碼稅，財政司司長明言，香港會積極根據國際共識，落實 BEPS 2.0。

"It is indeed progressively timely for the Budget Speech to brief the community on the preliminary views, from Hong Kong's perspective, on the OECD/G20 Base Erosion and Profit Shifting (BEPS) Project which focuses on possible solutions to governments for closing the gaps in existing international rules that allow corporate profits to 'disappear' or be artificially shifted to low/no tax environments, where little or no economic activity takes place. Given our mandate, HKCS is particularly interested in the Digital Tax component of BEPS, which deals with taxation issues in a digital economy, including internet commerce and cryptocurrencies like Bitcoin. We look forward to be kept informed on this issue and where relevant to contribute our views." Said Dr Suen.

### IT-related Measures of Budget 2021

In the budget announced today, there are various IT-related measures, which include:

#### 1. Encourage Good Use of Technologies to Combat Epidemics

- The Distance Business Programme was launched under the Anti-epidemic Fund ("AEF") to provide funding support for enterprises to adopt information technology solutions and cover the expenses for providing relevant training to their employees. An additional funding of \$1 billion will be subsequently allocated for the continuation of the programme and further enhancement.
- The Government will continue to support enterprises or manufacturers through, among others, the Public Sector Trial Scheme, the Technology Voucher Programme and the Re-industrialisation Funding Scheme in realising and commercialising their R&D outcomes, using technological services to improve their productivity or business processes, and setting up smart production lines in Hong Kong. This will enable them to better grasp the opportunities brought by the new economy.
- A total of \$375 million will be allocated to the Hong Kong Trade Development Council (TDC) in three years, for developing virtual platforms to enhance its capability to organise online activities and to proceed with digitalisation.

孫耀達稱：「財政預算由香港角度出發，初步向公眾簡介 BEPS 2.0，特別是政府該如何應對容許企業數碼盈利毋須報稅，或將盈利轉移往並無實質業務的低稅甚至免稅地區，以及如何收窄該等行為與國際現行慣例的差距，我們認為的確是及時之舉。對於香港電腦學會而言，我們特別關注數碼稅問題，因為該議題涉及數碼經濟如電子商貿、比特幣等虛擬貨幣。希望政府能及時知會我們事件的最新發展，而本會亦樂意就此一議題，不時提供業內意見。」

### 財政預算與資訊科技有關之措施

今日公布之財政預算中，各項與資訊科技有關之措施，包括：

#### 1. 鼓勵善用科技抗疫：

- 「防疫抗疫基金」下「遙距營商計劃」，資助企業的資訊科技方案及僱員培訓開支，將再增撥十億元繼續推行計劃，並提出優化措施。
- 繼續透過「公營機構試用計劃」、「科技券」、「再工業化資助計劃」等，支援企業或生產商將研發成果實踐和商品化、使用科技服務提升生產力或業務流程，以及在港設立智能生產線，以把握新經濟下的機遇。
- 分三年向香港貿易發展局撥款合共三億七千五百萬元，資助開發虛擬平台以增強舉辦線上活動的能力及進行數碼化。

- Issue \$5,000 electronic consumption vouchers in instalments to each eligible Hong Kong permanent resident and new arrival aged 18 or above to facilitate and stimulate local consumption
  - Once the pandemic further subsides, the Government will launch a large-scale publicity and promotional campaign at home and abroad, showcasing to the world the image of Hong Kong as a highly open international city in the Greater Bay Area from various perspectives such as finance, I&T, culture and creativity and tourism, as well as our unique advantages under "One Country, Two Systems". We hope to attract enterprises, investors and talent to Hong Kong.
- 向每名合資格的十八歲或以上香港永久性居民及新來港人士，分期發放總額五千元的電子消費券，鼓勵及帶動本地消費
  - 待疫情進一步緩和，政府會推出大型的海內外宣傳推廣活動，向全球多角度展示香港作為大灣區內高度開放和國際化的城市，在金融、創科、文創、旅遊等方面的不同面貌，以及「一國兩制」的獨特優勢，吸引企業、投資者及人才來港發展

## 2. Expediting the Progress of e-Government Development

- By mid-2022, unless there are legal or operational constraints, all government forms and licence applications can be submitted electronically.

The scheme has received 12 applications so far. The Advanced Manufacturing Centre in the Tseung Kwan O Industrial Estate and the Microelectronics Centre in the Yuen Long Industrial Estate, being developed by the HKSTPC, will be completed in the coming two years.

#### 4. Continue to Promote Research and Development

- Amendments were made to the Inland Revenue Ordinance in late 2018 to provide for enhanced tax reduction for qualifying R&D expenditure so as to encourage enterprises to devote resources to local R&D. The measure has delivered notable results. Since permission was granted for the remittance of Mainland R&D funding to Hong Kong, the Ministry of Science and Technology, Guangdong Provincial Government and Shenzhen Municipal Government in the past two years have approved over RMB 340 million for universities and research institutes in Hong Kong to conduct R&D or set up laboratories.
- The "InnoHK Research Clusters" which comprises Health@InnoHK on healthcare technologies and AIR@InnoHK on artificial intelligence and robotics technologies, has attracted many top-notch universities and research institutions in the world. The first batch of about 20 R&D laboratories will commence operation progressively in the first quarter of this year.
- Two years in a row, \$4,750 million per year will be injected to Innovation and Technology Fund (ITF), to sustain its 17 funding schemes as well as the work of over 50 R&D laboratories in the next three years.

- 將連續兩年向「創新及科技基金」每年注資四十七億五千萬元,支持旗下十七個資助計劃及五十多個研發實驗室未來三年的工作

## 5. Nurturing and Pooling Talents

- The Standing Committee on STEM Education of the Curriculum Development Council steers and promotes the long-term development of STEM education in primary and secondary schools, as well as reviews continuously the relevant curriculum.
- Over \$200 million will be set aside to extend the IT Innovation Lab in Secondary Schools Programme to primary schools. Funding of up to \$400,000 will be provided to each subsidised primary school in the coming three school years, thereby rolling out a "Knowing More About IT" Programme to enhance students' interests and knowledge in information technology and their applications through extra-curricular activities. The OGCIO will set up a one-stop support centre to provide assistance for primary schools.
- The pilot scheme, under which subsidies are provided for students who study science and technology in local universities to enrol in short-term I&T related internships, was implemented last year. Given the overwhelming response, eighty per cent of the interns indicated that they would consider pursuing a career in I&T after graduation. Therefore, the Government announced that the scheme would be regularised.
- Involving an expenditure of about \$2 billion, the Government will launch a Global STEM Professorship Scheme in the first half of this year, to support universities in attracting world-renowned I&T scholars and their teams to Hong Kong to participate in STEM teaching and research.
- The Government will continue to support the programmes for nurturing I&T talent, including the Research Talent Hub, The Re-industrialisation and Technology Training Programme, etc. The Greater Bay Area Youth Employment Scheme launched early this year also provides around 700 I&T places to encourage enterprises to employ Hong Kong's university graduates so that the latter can undertake I&T-related work and receive on-the-job training in Hong Kong and another city in GBA.

## 6. Supporting Youth Entrepreneurship

- The Government will continue to support start-ups through various means, including strengthening the support of the HKSTPC and Cyberport for their tenants and incubatees, backing university start-ups through the Technology Start-up Support Scheme for Universities, making use of the Innovation and Technology Venture Fund for co-investing with venture capital funds in local technology start-ups.
- The TDC will explore the use of its physical and online Business- to- Consumer platforms to assist young business starters in promoting their original products and gauging the preference of consumers.
- The Innovation and Technology Venture Fund (ITVF) appointed three new co-investment partners late last year, and it continue to partner with venture capital funds to invest in local start-ups.
- The HKSTPC and Cyberport will inject \$350 million and \$200 million into the two Funds respectively and extend their scope to cover Series B and later stage investments.
- Continue to support the Technology Start-up Support Scheme for Universities. Among those start-ups which have benefited from the Scheme since inception, over half of them have launched their products in the market, more than 40 per cent have earned revenue and about 60 per cent have received capital injection from investors with a total amount of some \$530 million.

## 7. Development of IT Infrastructure

- Various innovation and technology infrastructures have been available in the market, including the expansion of the two buildings under Stage 1 of the Science Park Expansion Programme, the Data Technology Hub (DT Hub) in the Tseung Kwan O Industrial Estate, the InnoCell adjacent to the Science Park, etc. It will continue its works in Science Park expansion and Cyberport 5 development.

## 6. 支持青年創科創業：

- 政府將繼續以不同方式支援初創企業，包括加強科技園公司及數碼港對其租戶和培育公司的支援，通過「大學科技初創企業資助計劃」支持由大學團隊成立的初創企業，以及運用創科創投基金，與風險投資基金共同投資本地創科初創企業

### Hong Kong Computer Society's Further Recommendations on Budget 2021

Dr. Suen said: "Apart from the actions stated in the Budget 2021, the HKCS would urge the Government to focus strategically and holistically on the following recommendations."

#### 1. Establish a Smart City Advisory Committee

- It is recommended to widely invite participants from technology industry, academics, and foreign experts to form an advisory committee, to provide more diversified suggestions on the government's planning of smart city development.
- Numerous local experts under the umbrella of the Hong Kong Computer Society are also happy to provide professional advice on the development of innovation and technology and smart cities for the government.

#### 2. Strengthen the support of the digitisation for disadvantaged communities

The government should allocate additional resources to support non-governmental organizations and charitable service groups to carry out operations electronically. Even when the relevant personnel are working at home, the recipients can still obtain the required services online.

### 香港電腦學會對財政預算的建議

孫耀達表示,為增強財政預算案的政策全面性,香港電腦學會再有以下的建議,以供政府考慮:

#### 1. 成立智慧城市顧問委員會

- 建議廣邀科技業界、學者、外地專家,組成一個顧問委員會,就政府的智慧城市發展,提供更多元化之建議。
- 香港電腦學會屬下眾多的本地專家,亦樂意為政府發展創科及智慧城市提供專業意見

#### 2. 加強支援弱勢社群數碼化

政府應增撥資源,支援非政府組織及慈善服務團體,進行運作電子化,就算相關人員須在家工作時,受助者仍可在線上獲得所需服務。

### 3. Analyzing social sentiment with big data

At present, many young generations in the society have different opinions and voices on government administration. It is necessary for the government to strengthen the reach-out to the public opinions. It is recommended to use big data and artificial intelligence technology to analyze the data of young generations, that are collected through outreach and liaison activities. Through analysis, to understand and predict changes in social sentiment, so that the Government would be able to more accurately get hold of the public opinions as reference for formulating policies, with the corollary to create new programs to mobilize the youth community so that they can actively and positively contribute to the Hong Kong community.

### 4. Open Data Policy

The government's Policy Address for the past two years has mentioned the policy goal of open data. However, in the past two years, progress has been slow. The Hong Kong Computer Society recommends that the Policy Address can include proposals of more effective and clear implementation methods to achieve the goal; and set up an open priority, based on the value of the data to the business community and the public. It is recommended that the government should conduct adequate consultation with all major stakeholders, including government departments, public and private organizations, security and privacy professionals, and open service providers, to develop an open data framework. It is particularly important to establish clear guidelines on risks and benefits of data privacy, as well as the awareness and participation of the community and stakeholders in the open data policy, during the different stages of the adoption. And it is essential to use various technical and administrative measures to reduce the risk of personal data privacy intrusion.

### 3. 以大數據分析社會情緒

目前社會上不少年輕人對政府施政有不同意見及聲音，政府有必要加強對民意之掌握。建議採用大數據及人工智能科技，分析經由外展及聯繫活動收集的年輕人意見數據，進行分析、了解及預測社會情緒的變化，更準確地了解民意，以作為施政時的參考。

### 4. 開放數據政策

政府在過去兩年的施政報告，都有提及開放數據的政策目標，然而兩年以來，進度仍覺緩慢。香港電腦學會建議施政報告提出更有效及清晰的實施方法，以達致目標；並根據數據對商界及公眾的價值，訂出開放的優先次序。建議政府應對各主要的持份者，包括政府部門、公營及私營機構、保安與私隱專才，以及開放服務提供者等，進行充份諮詢，以發展開放數據的框架，特別是在開放數據的不同階段，制定數據私隱風險及益處分析的指引，以及社群與持份者對開放數據政策的意識及參與，並盡量運用各種技術及行政措施，以減低個人數據私隱遭入侵之風險。

## 5. Artificial Intelligence Policy

In the digital age, it is inevitable that artificial intelligence and machine learning will affect Hong Kong's economic and social development. The government should develop artificial intelligence policies to support the application of related technologies and supervise their applications and formation in various important services. Policies should include ethical requirements for the application of artificial intelligence, technological development, compliance with individual industry legal requirements, data sharing policies, privacy and compliance, etc. It is recommended to establish a high-level advisory committee to supervise its development. The committee must analyze and deal with the many traditional types of jobs that are likely to be eliminated due to the emergence of artificial intelligence, including the impact on the labor market, ways to assist in labor transformation, social expectation management for labor market changes, retraining and skill upgrading of labor, etc. All the above factors require strategic cooperation from the government to prepare the next generation for the digital transformation society to ensure the stability and prosperity of Hong Kong.

## 5. 人工智能政策

身處數碼年代，人工智能及機器學習影響香港的經濟及社會發展，已是無可避免。政府應發展人工智能政策，以支援相關技術的應用，並監管其在各項重要服務中的應用與形式。政策應包括應用人工智能的倫理要求、技術發展、符合個別行業法例要求、數據分享政策、私隱及合規等。建議設立一個高層次的顧問委員會，以督導其發展。委員會須分析及處理由於人工智能的出現而面臨淘汰的眾多傳統工種，包括對勞工市場的衝擊、如何協助勞工轉型、對勞動力市場變化進行社會期望管理、對勞動力的再培訓及技能提升等。以上各項因素均需政府進行策略性配合，為下一代的數碼轉型社會早作準備，以確保香港的安定繁榮。

## Robocon Hong Kong Contest 2020 全港大專生機械人大賽2020

As a well-respected and leading ICT organisation, HKCS is always committed to the development of the industry, community service, and ensuring that IT plays a vital role in social development while exerting a positive impact on the lives of the public. There were quite a lot of organisations contributed to the computer donation to the underprivileged students, but it seems that many students were still missing computers for their class work. To tackle the current issue, HKCS kicked off an initiative to minimise the gap, making donation of computer devices to the underprivileged students directly.

The campaign was supported by various large corporations including Securities & Futures Commission, Hong Kong Disneyland Resort and Hysan Development Co. Ltd. Over 200 used computer devices, including PCs monitors and notebooks, were collected. The delivery was supported by Eastern Worldwide Company Limited.

Under the coordination of HKCS, the used computer devices were directly distributed to underprivileged students in schools by AiTLE while Rotary Club of Golden Bauhinia Hong Kong supported the donation of computer devices to underprivileged students living in subdivided flat.

香港電腦學會一向致力於專業和行業的發展、社區服務，以及確保資訊科技繼續推動社會發展，能對大眾的生活產生積極影響。目前已有不少機構參與向弱勢社群學童捐助電腦，然而尚有為數不少的弱勢學童未能受惠，沒有足夠的電腦配備用於課堂內外的學習。因此，香港電腦學會發起二手電腦捐助活動，直接將電腦裝置贈予弱勢學童。

是次捐助活動，獲得多家大機構支持，捐贈及協助收集二手電腦裝置，包括證券及期貨事務監察委員會、香港迪士尼樂園度假區及希慎興業有限公司等，募集了超過200部二手電腦裝置，包括個人電腦、顯示屏及手提電腦等。在運輸方面，也獲得東源大地有限公司的支持。

在香港電腦學會的聯絡下，透過「資訊科技教育領袖協會」(AiTLE)，將二手電腦設備轉贈予正在就學的弱勢社群學童；而「香港金紫荊扶輪社」則會協助直接分發二手電腦予居於劏房的弱勢家庭學童。
